Review

.....

Additional Methods

Grounded in interview and observation.

Sensemaking

It is the process of “structuring the unknown” (Waterman, 1990, p. 41) by “placing stimuli into some kind of framework” that enables us “to comprehend, understand, explain, attribute, extrapolate, and predict” (Starbuck & Milliken, 1988, p. 51).

Organize Findings

Find Themes

Identify Insights

Create Frames

Themes

- Themes are patterns, often relating to the behaviours and experiences of actors and the needs and motivations expressed through those behaviours.

1

Well-informed.

Is it informed by multiple data points—including secondary research, lived experience, and subject matter expertise?

2

More than an observation.

Does it offer insight into how or why a phenomenon is occurring?
Does it offer a compelling reframe of something we already know?

3

So what?

Does it help people understand why it matters? Does it capture a tension or a shift that needs to happen? Does it connect to project impact objectives and learning aims?

Themes

- Themes are patterns, often relating to the behaviours and experiences of actors and the needs and motivations express through those behaviours.

Frames

Frames are thinking tools that act as lenses for explaining and interpreting the problem space.

Exercise

- **Head to** [Frame Creation and Design in the Expanded Field - ScienceDirect](#)
- **Read the case study** (Italicized and beginning: *"A brief example should help to explain the workings of this frame creation process:"*)
- **Discuss.** What are your thoughts on this approach? What does it make possible? What are its strengths? Shortcoming?

Create Frames

Point of View

What's going on.

.....

.....

Point of View

- Variousy called a problem statement or design brief – synthesizes our conclusions vis a vis the context, frame, and the specific problems and opportunities to address within that frame.

Point of View

- Answers the question, “What do we need to change?? Where and with whom precisely will we apply leverage in order to shift the system into a desirable alternative pattern?

_____ needs to _____ because _____.

Actor needs to _____ because _____.

Actor needs to **Need** because _____.

Actor needs to **Need** because **Insight**.

Exercise

- **Consider the following POV.**
- **Identify the actor, the need, and the insight.**
- **Discuss: What findings are baked into the POV? What does the POV tell us about what designers may have discovered in their research?**
- **Discuss: What does this POV tell us about the frame? What other frames are possible?**

A harried mother of three, rushing through the airport only to wait hours at the gate, needs to entertain her playful children because “annoying little brats” only irritate already frustrated fellow passengers.

Imagining Alternatives

.....

.....

.....

Ideation is...

...the creative act of generating ideas - both a stance or orientation and a set of enabling strategies.

Ideation

Ideation is where we answer *how* will we bring about the change? *How* will we intervene?

“How might we..?”

“**How might we...?**” statements are mechanisms for enabling ideation by reframing our POVs as provocations.

Point of View

A harried mother of three, rushing through the airport only to wait hours at the gate, needs to entertain her playful children because “annoying little brats” only irritate already frustrated fellow passengers.

Point of View

A harried mother of three, rushing through the airport only to wait hours at the gate, needs to entertain her playful children because “annoying little brats” only irritate already frustrated fellow passengers.

How Might We...?

Point of View

A harried mother of three, rushing through the airport only to wait hours at the gate, needs to entertain her playful children because “annoying little brats” only irritate already frustrated fellow passengers.

How Might We...?

...use the kids' energy to entertain fellow passengers?

Point of View

A harried mother of three, rushing through the airport only to wait hours at the gate, needs to entertain her playful children because “annoying little brats” only irritate already frustrated fellow passengers.

How Might We...?

...use the kids' energy to entertain fellow passengers?

...separate the kids from the fellow passengers?

Point of View

A harried mother of three, rushing through the airport only to wait hours at the gate, needs to entertain her playful children because “annoying little brats” only irritate already frustrated fellow passengers.

How Might We...?

...use the kids' energy to entertain fellow passengers?

...separate the kids from the fellow passengers?

...make the wait the most exciting part of the trip?

“How might we..?”

There is a framework for crafting HMW questions.

How Might We...?

Amp up the good: HMW use the kids' energy to entertain fellow passenger?

Remove the bad: HMW separate the kids from fellow passengers?

Explore the opposite: HMW make the wait the most exciting part of the trip?

Question an assumption: HMW entirely remove the wait time at the airport?

Go after adjectives: HMW we make the rush refreshing instead of harrying?

ID unexpected resources: HMW leverage free time of fellow passengers to share the load?

Create an analogy from need or context: HMW make the airport like a spa? Like a playground?

Play POV against the challenge: HMW make the airport a place that kids want to go?

Change a status quo: HMW make playful, loud kids less annoying?

Break POV into pieces: HMW entertain kids? HMW slow a mom down? HMW mollify delayed passengers?

Exercise

In small groups:

1. **Consider the following POV.**
2. **Use the heuristics to craft HMW questions.** Try a few different approaches. Write these down! You'll need them for the next exercise.
3. **Discuss:** What does adopting different approaches accomplish? More broadly, what good are How Might We questions?
4. **Reflect:** Do some approaches come more naturally to you than others?

A toddler's parents, trying to avoid potty training accidents that are inconvenient for the parents and discouraging to the toddler, need to help their child be more patient on the potty because accidents commonly occur after the toddler quickly bores and leaves the potty too soon.

“How might we..?”
